Alamo Heights Engaged Classroom Cohort

Thank you for your interest in becoming a participant in the ***Alamo Heights ISD Engaged Classroom Cohort***. We are seeking teachers who have embraced the philosophy of a learning platform and are willing to investigate how this concept is actualized in the classroom. Secondary to this purpose is the utilization of digital tools as instruments for intensifying the learning platform. If chosen, the expectation would be for your classroom to evolve into the type of digital environment that exemplifies a learning platform and becomes a model for other teachers to emulate. You will be provided with professional learning and coaching, training on digital tools, and support from the Technology and Curriculum and Instruction departments necessary for the transformation from a teaching to a learning environment.

It is our belief that in addition to the design of engaging work for students, an integral part of a learning platform is the seamless integration of technology including student mobile devices into every aspect of the student academic experience to support the AHISD mission and strategic objectives.

Expectations for your involvement in this program will be to develop an expertise aligned with district vision and profile of a learner toward 21st century learning in your classroom, with every child, every day through one to one coaching and professional learning experiences facilitated by instructional coaches.

1. Attend prescribed trainings offered by the District.
2. Meet regularly with your coach/mentor and other teachers in the cohort.
3. Open your classroom to visitors from within the district as well as stakeholders in our community and neighboring districts.
4. Actively communicate progress of your engaged classroom via social media.

Application Timeline	
Feb 27	Application due
March 10	Selected candidates will be notified
